SYNTHETIC OILS

MK-dent®
GERMANY

MK-DENT HANDPIECE LUBRICANTS

MK-Dent handpiece lubricants were designed to increase the lifespan of your dental handpieces.

These premium synthetic oils reduce friction creating a lower working temperature and allows your handpieces to generate greater power.

These lubricants can withstand any setting on your sterilizer and simultaneously reduce deposit buildup more so than any of our competitors that we tested this product against all the while leaving behind a minty scent that your patients will appreciate .
